

MindWave Manager User Guide

Introduction

The MindWave™ Manager (MWM) is a utility to help your computer find your MindWave. It also displays information about your MindWave like your MindWave's ID and the serial port that the MindWave USB Wireless Adapter is on.

You will need to run the MindWave Manager and perform the search process before the bundled MindWave applications will work.

Once your MindWave is found, you will not need to run the MindWave Manager again unless you wish to use another MindWave headset on the computer, or change to another computer.

Installation

The MindWave Manager is installed as part of the MindWave CD install process. It will also run automatically at the end of the installation process.

Usage

The Search Wizard of the MindWave Manager is run automatically during the MindWave installation process. You can also find MindWave Manager in the **Start** menu, under **Programs > NeuroSky MindWave > Utilities**.

Searching for your MindWave

Simply click the ***Search for your MindWave...*** button in the main window of the MindWave Manager, and follow the on-screen instructions.

Forgetting your MindWave

If you wish for the computer to forget your MindWave (for example, if you wanted to use a different MindWave with your computer), simply click the ***Forget this MindWave*** button in the main window of the MindWave Manager.

Troubleshooting

MindWave Manager wasn't able to find my MindWave!

Please make sure of the following before retrying MindWave Manager:

1. The MindWave USB Adapter is plugged in, and the red LED is lit.
2. The drivers are correctly installed for the MindWave USB Adapter.
3. The MindWave is using fresh battery, the switch is turned on, and the red LED is lit.
